Organizational Maintenance Repair Parts and Special Tools Lists

CRANE, WHEEL MOUNTED: 5-TON CAPACITY AT 10-FOOT RADIUS, ⅜ CU. YD.; 1 ENGINE DIESEL DRIVEN, 4X4 AIR TRANSPORTABLE (HANSON MACHINERY MODEL H446)

FSN 3810-948-0407

Current as of 3 April 1972

TM 5-3810-233-20P, 24 November 1970, is changed as follows:

Page ii. In the title of Section IV, the statement "(NOT APPLICABLE)" is rescinded.

Page iv. Paragraph 4*e* is added after paragraph 4*d*.

e. Action change codes indicated in the left-hand margin of the listing page denote the following:

N—Indicates an added item.
C—Indicates a change in data.
R—Indicates a change in FSN only.

Page v. In paragraph 7, the following Federal Supply Codes are added in their proper numerical order.

Code	*Manufacturer*
04866	Nylock-Detroit Corp.
07941	Vibration Mountings and Controls Inc.
08752	Parker Hydraulics Div. of Parker Hannifin Corp.
80672	Alexander Tagg Industries Inc.
84256	Avdel Inc.
88044	Aeronautical Standard
97403	Army Engineering Research and Development Laboratories
98625	Aeroquip Corp. Marman Div.

All changes, additions, or deletions of Federal stock numbers or manufacturer's part numbers should be appropriately reflected in the parts listing and index of the manual.

CHANGE
NO. 3

HEADQUARTERS
DEPARTMENT OF THE ARMY
WASHINGTON, DC, *18 July 1980*

Organizational Maintenance Repair Parts And Special Tools Lists For CRANE, WHEEL MOUNTED: 5-TON CAPACITY AT 10-FOOT RADIUS, 3/8 CU. YD.; 1 ENGINE DIESEL DRIVEN, 4 x 4 AIR TRANSPORTABLE (HANSON MACHINERY MODEL H446) NSN 3810-00-948-0407

Current as of March 1980

TM 5-3810-233-20P, 24 November 1970, is changed as follows:

Page iii, Paragraph 3. Before subparagraph *a* add the following:

NOTE

Two types of SMR codes are used in this manual. An explanation of the latest SMR codes is given in subparagraph *a*1.

Subparagraph *a*.1 is added as follows

a.1. Explanation of Source, Maintenance, and Recoverability Codes (SMR).

(1) *Source code.* Source codes indicate the manner of acquiring support items for maintenance, repair, or overhaul of end items. Source codes are entered in the first and second positions of the Uniform SMR Code format as follows:

Code	*Definition*
PA —	Item procured and stocked for anticipated or known usage.
PB —	Item procured and stocked for insurance purpose because essentiality dictates that a minimum quantity be available in the supply system.
PC —	Item procured and stocked and which otherwise would be coded PA except that it is deteriorative in nature.
PD —	Support item, excluding support equipment, procured for initial use or outfitting and stocked only for subsequent or additional initial issues or outfittings. Not subject
PE —	Support equipment procured and stocked for initial issue or outfitting to specified maintenance repair activities.
PF —	Support equipment which will not be stocked but which will be centrally procured on demand.
PG —	Item procured and stocked to provide for sustained support for the life of the equipment. It is applied to an item peculiar to the equipment which, because of probable discontinuance or shutdown of production facilities, would prove uneconomical to reproduce at a later time.
KD —	An item of a depot overhaul/repair kit and not purchased separately. Depot kit defined as a kit that provides item required at the time of overhaul or repair.
KF —	An item of a maintenance kit and not purchased separately. Maintenance kit defined as a kit that provides an item that can be replaced at organizational or intermediate levels of maintenance.
KB —	Item included in both a depot overhaul/repair kit and a maintenance kit.
MO —	Item to be manufactured or fabricated at organizational level.
MF —	Item to be manufactured or fabricated at direct support maintenance level.
MH —	Item to be manufactured or fabricated at the general support maintenance level.
MD —	Item to be manufactured or fabricated at the depot maintenance level.
AO —	Item to be assembled at organizational level.
AF —	Item to be assembled at direct support maintenance level.
AH —	Item to be assembled at general support maintenance level.
XA —	Item is not procured or stocked because the requirements for the item will result in the replacement of the next higher assembly.
XB —	Item is not procured or stocked. If not available through salvage, requisition.
XC —	Installation drawing, diagram, instruction sheet, field service drawing, that is identified by manufacturer's part number.
XD —	A support item that is not stocked. When required, item will be procured through normal supply channels.

*This change supersedes C 2, 19 September 1973.

NOTE

Cannibalization or salvage may be used as a source of supply for any items coded above except those coded XA and aircraft support items restricted by AR 700-42.

(2) *Maintenance code.* Maintenance codes are assigned to indicate the levels of maintenance authorized to USE and REPAIR support items. The maintenance codes are entered in the third and fourth positions of the Uniform SMR Code format as follows:

(a) The maintenance code entered in the third position will indicate the lowest maintenance level authorized to remove, replace, and use the support item. The maintenance code entered in the third position will indicate one of the following levels of maintenance.

Code	*Application/Explanation*
C —	Crew or operator maintenance performed within organizational maintenance.
O —	Support item is removed, replaced, used at the organizational level.
F —	Support item is removed, replaced, used at the direct support level.
H —	Support item is removed, replaced, used at the general support level.
D —	Support items that are removed, replaced, used at depot, mobile depot, or specialized repair activity only.

(b) The maintenance code entered in the fourth position indicates whether the item is to be repaired and identifies the lowest maintenance level with the capability to perform complete repair (i.e., all authorized maintenance functions). This position will contain one of the following codes:

O —	The lowest maintenance level capable of complete repair of the support item is the organizational level.
F —	The lowest maintenance level capable of complete repair of the support item is the direct support level.
H —	The lowest maintenance level capable of complete repair of the support item is the general support level.
D —	The lowest maintenance level capable of complete repair of the support item is the depot level.
Z —	Nonrepairable. No repair is authorized.
B —	No repair is authorized. The item must be reconditioned by adjusting, lubricating, etc., at the user level. No parts or special tools are procured for the maintenance of this item.

(3) *Recoverability code.* Recoverability codes are assigned to support items to indicate the disposition action on unserviceable items. The recoverability code is entered in the fifth position of the Uniform SMR Code format as follows:

Recoverability Codes	*Definition*
Z —	Nonrepairable item. When unserviceable, condemn and dispose at the level indicated in position 3.
O —	Repairable item. When uneconomically repairable, condemn and dispose at organizational level.
F —	Repairable item. When uneconomically repairable, condemn and dispose at the direct support level.
H —	Repairable item. When uneconomically repairable, condemn and dispose at the general support level.
D —	Repairable item. When beyond lower level repair capability, return to depot. Condemnation and disposal not authorized below depot level.
L —	Repairable item. Repair, condemnation, and disposal not authorized below depot/specialized repair activity level.
A —	Item requires special handling or condemnation procedures because of specific reasons (i.e., precious metal content, high dollar value, critical material or hazardous material). Refer to appropriate manuals/directives for specific instructions.

Page v. Paragraph 8 is superseded as follows:

8. Reporting Errors and Recommending Improvements

You can help to improve this manual. If you find any mistakes or if you know of a way to improve the procedures, please let us know. Mail your letter or DA 2028 (Recommended Changes to Publications and Blank Forms) direct to: (Commander, US Army Tank-Automotive Materiel Readiness Command, ATTN: DRSTA-MBP, Warren, MI 48090. A reply will be furnished to you.

Line No. 04614, column (2). Change "5310-012-3221" to "5310-00-732-0558".

Line No. 04621.

Column (2) change "3810-756-1473" to "3815-00-756-1473".

Column (3) change "ROLLER ASSEMBLY: MAIN BOOM (27186) 20256" to "ROLLER ASSEMBLY: CRANE (13841) 20256".

Following line 04621 add the following:

Column (1), "PAOZZ 04621A".

Column (2), "3110-00-198-1389".

Column (3), "RING BEARING, INNER: ROLLER ASSY (92563) M124".

Column (4), "EA".

Column (5), "1".

Column (7) (a), "123".

Column (7) (b), "10A".

Page 94.

Line No. 04634, column (2). Change "5310-018-7130" to "5310-00-584-5272".

Line No. 04636, column (2). Change "5310-018-7130" to "5310-00-584-5272".

Page 95.

Line No. 04669.

Column (1). Change "PO" to "XBOZZ".

Column (2). Delete "6685-251-1358".

Line No. 04670.

Column (2). Change "6685-496-2481" to "4910-00-868-6871".

Column (3). Change "GAGE, PRESSURE, DIAL INDICATING: 0.3000 PS" to "TESTER, HYDRAULIC CIRCUIT, PORTABLE".

Column (7) (a). Delete "128".

Column (7) (b). Delete "3".

All changes, additions, or deletions of stock numbers, manufacturers' codes, and part numbers with this change should be appropriately reflected in the index.

By Order of the Secretary of the Army:

E. C. MEYER
General, United States Army
Chief of Staff

Official:

J. C. PENNINGTON
Major General, United States Army
The Adjutant General

Distribution:

To be distributed in accordance with DA Form 12-25B, Organizational Maintenance requirement for Cranes: Wheel Mounted.

TECHNICAL MANUAL
NO. 5-3810-233-20P

HEADQUARTERS
DEPARTMENT OF THE ARMY
Washington, D. C., *24 November 1970*

ORGANIZATIONAL MAINTENANCE REPAIR PARTS AND SPECIAL TOOLS LISTS

CRANE, WHEEL MOUNTED: 5 TON CAPACITY AT 10-FOOT RADIUS, 3/8 CU. YD; 1 ENGINE DIESEL DRIVEN, 4 x 4 AIR TRANSPORTABLE (HANSON MACHINERY MODEL H446) FSN 3810-948-0407

Current as of 30 October 1970

Section IV.	SPECIAL TOOLS, TEST AND SUPPORT EQUIPMENT (NOT APPLICABLE)		
V.	FEDERAL STOCK NUMBER AND REFERENCE NUMBER INDEX		193

SECTION I
INTRODUCTION

1. Scope

This manual lists repair parts, special tools, test and support equipment required for the performance of organizational maintenance of the crane.

2. General

This Repair Parts and Special Tools List is divided into the following sections:

a. Prescribed Load Allowance (PLA) — Section II. A composite listing of the repair parts, special tools, test and support equipment having quantitative allowances for initial stockage at the organizational level.

b. Repair Parts — Section III. A list of repair parts authorized for the performance of maintenance at the organizational level. Individual parts and major assemblies are listed alphabetically by item name within the numbered functional groups. Assembly components and subassemblies are indented and listed alphabetically by item name under major assemblies.

c. Special Tools, Test and Support Equipment — Section IV. A list of special tools, test and support equipment authorized for the performance of maintenance at the organizational level.

d. Federal Stock Number and Reference Number Index — Section V. A list of Federal Stock Numbers in ascending numerical sequence followed by a list of reference numbers in ascending alpha-numeric sequence, cross-referenced index number.

3. Explanation of Columns

The following provides an explanation of columns in the tabular lists in sections II, III, and IV:

a. Source, Maintenance, and Recoverability Codes (SMR).

NOTE

Common hardware items known to be readily available in Army supply channels are assigned Maintenance codes only. Source codes, Recoverability codes, and Maintenance Allowances are not assigned this category.

(1) Source code indicates the selection status and source for the listed item. Source codes are:

Code	Explanation
P	Repair parts which are stocked in or supplied from the GSA/DSA, or Army supply system and authorized for use at indicated maintenance categories.
M	Repair parts which are not procured or stocked, but are to be manufactured in indicated maintenance levels.
A	Assemblies which are not procured or stocked as such, but are made up of two or more units. Such component units carry individual stock numbers and descriptions are procured and stocked separately and can be assembled to form the required assembly at indicated maintenance categories.
X	Parts and assemblies which are not procured or stocked and the mortality of which normally is below that of the end item or component. The failure of such part or assembly should result in retirement of the end item from the supply system.
X1	Repair parts which are not procured or stocked. The requirement of such items will be filled by the use of the next higher assembly or component.
X2	Repair parts which are not stocked. The indicated maintenance category requiring such repair parts will attempt to obtain them through cannibalization. Where such repair parts are not obtainable through cannibalization, requirements will be requisitioned, with accompanying justification, through normal supply channels.
G	Major assemblies that are procured with PEMA funds for initial issue only as exchange assemblies at DSU and GSU level. These assemblies will not be stocked above GS and DS level or returned to depot supply level.

(2) Maintenance code indicates the lowest category of maintenance authorized to install the listed item. The maintenance level code is:

Code	Explanation
O	Organizational Maintenance

(3) Recoverability code indicates whether unserviceable items should be returned for recovery or salvage. Items not coded are expendable. Recoverability codes are:

Code	Explanation
R	Applied to Repair parts (assemblies and components) which are considered economically repairable at direct and general support maintenance levels. When the maintenance capability to repair these items does not exist, they are normally disposed of at the GS level. When supply considerations dictate, some of these repair parts may be listed for automatic return to supply for depot level repair as set forth in AR 710-50. When so listed, they will be replaced by supply on an exchange basis.
T	High dollar value recoverable repair parts which are subject to special handling and are issued on an exchange basis. Such repair parts normally are repaired or overhauled at depot maintenance activities.
U	Repair parts specifically selected for salvage by reclamation units because of precious metal content, critical materials, or high dollar value reusable casings or castings.

b. Federal Stock Number. This column indicates the Federal stock number assigned to the item and will be used for requisitioning purposes.

c. Description. This column indicates the Federal item name and any additional description of the item required. Assembly components and subassemblies are indented under major assemblies. The abbreviation "w/e", when used as part of the nomenclature, indicates the Federal stock number includes all armament, equipment, accessories, and

repair parts issued with the item. A five-digit Federal supply code for manufacturers in parenthesis is followed by a part number or other reference number. Material required for manufacture or fabrication is identified.

d. Unit of Measure (U/M). A character alphabetic abbreviation indicating the amount or quantity of the item upon which the allowances are based, e.g., ft, ea, pr, etc.

e. Quantity Incorporated in Unit. This column indicates the quantity of the item used in the assembly group. A "V" appearing in this column in lieu of a quantity indicates that a definite quantity cannot be indicated (e.g., shims, spacers, etc.).

f. Fifteen-Day Organizational Maintenance Allowance.

(1) The allowance columns are divided into four subcolumns. Indicated in each subcolumn opposite the first appearance of each item is the total quantity of items authorized for the number of equipments supported. Subsequent appearances of the same item will have the letters "REF" in the allowance columns. To locate the referenced item, locate the FSN or reference number in the index. The first appearance of the item in the index, is the referenced item. Items authorized for use as required but not for initial stockage are identified with an asterisk in the allowance column.

(2) The quantitative allowance for organizational level of maintenance represents one initial prescribed load for a 15-day period for the number of equipments supported. Units authorized additional prescribed loads, multiply the number of prescribed loads by the quantity in the appropriate density column to determine the number of repair parts authorized.

(3) To determine allowances when supporting more than 100 of these equipments: First, divide the number of equipments supported by 100 by moving the decimal two spaces left; second, multiply the result by the quantity in the 51-100 density column. Example, authorized for 51-100 equipment is 40; for 150 equipments, multiply 40 by 1.50 or 60 parts authorized.

(4) Subsequent changes to allowances will be limited as follows: No change in the range of items is authorized. If additional items are considered necessary, recommendation should be forwarded to U. S. Army Mobility Equipment Command for exception or revision to the allowance list. Revisions to the range of items authorized will be made by the U.S. Army Mobility Equipment Command based upon engineering experience, demand data, or TAERS information.

g. Illustration. This column is divided as follows:

(1) *Figure number.* Indicates the figure number of the illustration in which the item is shown.

(2) *Item number.* Indicates the callout number used to reference the item in the illustration.

4. Special Information

a. Repair parts mortality has been based on 3000 hours of operation per year.

b. Parts which require manufacture or assembly at a category higher than that authorized for installation will indicate in the source column the higher category.

c. The following publications pertain to the crane and its components.

LO 5-3810-233-12-1, 2 and 3	Lubrication Order
TM 5-3810-233-12	Operator and Organizational Maintenance Manual

d. The illustration in this manual are identical to the applicable illustrations published in the -35P, Direct and General Support and Depot Maintenance Repair Parts and Special Tools List manual, and the figure numbers are the same as appear in that manual. The -35P illustrations are given for a better understanding of the parts relationship, however, only those parts assigned maintenance code "O" are listed in the tabular portion and only these parts are authorized for requisitioning from this manual.

5. How to Locate Repair Parts

a. When Federal stock number or reference number is unknown:

(1) *First.* Using the table of contents, determine the functional group or subgroup within which the repair part belongs. This will refer to a page in the parts listing. Locate the appropriate page in the manual and identify the part.

(2) *Second.* Locate the repair part and the illustration figure and item number as shown in the last two columns of the repair parts listing.

(3) *Third.* Identify the repair part on the illustration.

b. When the Federal stock number or reference number is known:

(1) *First.* Using the Index of Federal Stock Numbers and Reference Numbers find the pertinent Federal stock number or reference number. This index is in ascending FSN sequence followed by a list or reference numbers in alpha-numeric sequence, cross-referenced to an index number.

(2) *Second.* Using the Repair Part Listing, find the index number referenced in the Index of Federal Stock Numbers and Reference Numbers.

6. Abbreviations

deg	degree (s)
dia	diameter
ft	foot (feet)
in	inch (es)
lg	length (long)
lh	left hand
mtg	mounting
nc	national coarse
nf	national fine
npt	national pipe thread
nptf	national pipe thread fine
rh	right hand
std	standard
thd	thread (ed)

7. Federal Supply Codes for Manufacturers

Code	Manufacturer
00000	Ordnance Corps
00624	Aeroquip Corp. Aircraft Division
01843	American Bosch Marketing Division
02249	Gresen Mfg. Co.
03890	Markel L. Frank and Sons
04255	The Weatherhead Co.
04618	American Pamcor Inc.
05755	Phillips International Co. Division of Phillips Screw Co.
06853	Bendix-Westinghouse Automotive Air Brake Co.
08288	Military Supply Standards
08484	Breeze Corporations Inc.
08805	General Electric Co. Large Lamp Dept.
09386	Budd Co. The Automotive Division
10129	Sarasota Precision Products Inc.
12787	Goss Gas Inc.
13445	Cole-Hersee Co.
13829	Commercial Shearing and Stamping Co.
14939	Delbar Products Inc.
16764	Delco-Remy Division of General Motors Corp.
18265	Donaldson Co. Inc.
19207	Army Tank-Automotive Center
21450	Ordnance Corps Engineering Standards
22337	Firestone Tire and Rubber Co.

94431	Garrison Mfg. Co.
95406	Everhot Products Co.
96105	Funk Mfg. Co.
96259	Fluid Controls Inc.
96906	Military Standard
97109	Briskin Mfg. Co.
98624	Michigan Fleet Equipment Co.
99103	Formrite Tube Co.

8. Recommendations for Maintenance Publication Improvements

Report of errors, omissions, and recommendations for improving this publication by the individual user is encouraged. Reports should be submitted on DA Form 2028 (Recommended Changes to Publications) and forwarded direct to Commanding General, U. S. Army Mobility Equipment Command, ATTN: AMSME-MPP, 4300 Goodfellow Boulevard, St. Louis, Mo. 63120.
